1. Introduction

1.1 Project Description

The **Airstro – A Next-Generation Flight Booking & Travel Experience Platform.**

Airstro is designed to streamline the experience of flight search, booking, and travel management for both users and administrators by providing an easy-to-use and visually appealing platform.

The system is fully responsive, mobile-friendly, and features a modern professional UI for improved usability.

The **Airstro** consists of two major panels:

- **Admin Panel**
- **User Panel**

Admin Panel

- Login is required using admin email and password.
- Admin can add new flights, update flight details, or delete flights.
- Admin can view all flights available in the system.
- Admin can view all user bookings along with passenger details.

- Admin can update booking status or delete bookings if necessary.
- Admin dashboard provides a centralized flight & booking management interface.

User Panel

- Users can Register/Login using email and password for authentication.
- Main navigation includes: Home, Deals & Offers, My Trips, About Us, Login, Signup
- Home Page displays Hero section, booking widget, offers, and recommended destinations.
- About Page describes Airstro's mission and international network along with loyalty benefits.
- Flight Search Page allows users to search for flights based on:
 - From / To
 - One-Way / Round-Trip
 - Travel Date(s)
 - Number of Passengers
 - Class Type (Economy / Business)
- Flight Results Page shows available flights with:
 - Filters (airlines, stops, time slots)
 - Sorting (price, duration, time)
 - Expandable details & price comparison

- Users can select a flight and complete the booking instantly.
- My Trips Page displays:
 - All booked flights
 - Total fare
 - Booking status
 - Users can cancel flights anytime
- Users cannot book or manage flights without logging in.

1.2 Project Profile

Project Title	Airstro
Frontend	HTML, CSS
Backend	PHP
Database	MySQL
Browser	Chrome, FIREFOX, SAFARI
Platform	VS Code, Xampp
Internal Guide	Prof. Twinkle S. Panchal
Submitted To	Prof. Twinkle S. Panchal

2. Objectives

Start to End Process:

1. Collecting Information for the System

(Requirement Gathering and Analysis).

2. Designing the System

(Preparing the design based on gathered information).

3. Creating Database Structure

(Defining and implementing table structures).

4. Front-end and Back-end Integration

(Connecting user/admin interface with the backend functionalities).

5. Custom Functions & Validations

(Implementing system-specific functions and data validations).

6. Making the Design Responsive

(Ensuring mobile-friendly, responsive design).

7. Testing

(Verifying functionality, usability, and performance).

3. System Flow Diagram (SFD)

Admin Process Flow Diagram

7. System Design

Admin Login

The screenshot shows the Airstro Admin Login interface. At the top, there is a navigation bar with the Airstro logo, a tagline "Fly smart. Go further.", and links for Book, Flight Status, My Trips, and About. On the right side of the nav bar are "Log in" and "Sign up" buttons. The main area features a login form titled "Login" with a "Welcome back" message and a "Continue to your account." link. It includes fields for "Email" and "Password", a "Login" button, and a "Create account" link. Below the form, there is a footer section with three columns: "About Airstro" (describing it as a demo airline booking system), "Quick links" (links to Book a flight, Flight status, and My bookings), and "Support" (links to Contact us and FAQs). The footer also includes a copyright notice and a UI inspiration note.

User Login

The screenshot shows the Airstro login interface. At the top, there's a blue header bar with the brand logo 'AIRSTRO' in white. Below the header, the main content area has a light gray background. On the left, there's a dark sidebar containing links like 'About Airstro', 'Quick links', and 'Support'. The central part of the page features a white login form with a rounded rectangle border. It includes fields for 'Email' and 'Password', a 'Login' button, and a link for 'Create account'. At the bottom of the page, there's a dark footer bar with copyright information and a note about the UI being inspired by modern airline websites.

User Signup

The screenshot shows the Airstro signup interface. Similar to the login page, it has a blue header bar at the top with the 'AIRSTRO' logo. The main content area has a light gray background. On the left, there's a dark sidebar with 'About Airstro', 'Quick links', and 'Support' sections. The central part of the page features a white sign-up form with a rounded rectangle border. It includes fields for 'Full name', 'Email', and 'Password', a 'Create account' button, and a link for 'Log in'. At the bottom of the page, there's a dark footer bar with copyright information and a note about the UI being inspired by modern airline websites.

8. PROJECT SUMMARY/REFERENCES

Summary

- The PHP Web Application is a role-based system built with PHP and MySQL, featuring separate modules for Admin and Client.
- Users can register, log in, and manage their profiles, while Admins can monitor users, control content, and manage system operations.
- The application uses a config module for database connectivity, a database folder for schema/data, and assets (CSS, JS, images) for UI design.
- It demonstrates CRUD operations, session management, and secure role-based access.
- This project showcases how PHP can be used to build dynamic, secure, and user-friendly web applications.
